

P53 (Ab-9)
Antibody

#21084

Catalog Number: 21084-1, 21084-2

Amount: 50µg/50µl, 100µg/100µl

Swiss-Prot No. : P04637

Form of Antibody: Rabbit IgG in phosphate buffered saline (without Mg²⁺ and Ca²⁺), pH 7.4, 150mM NaCl, 0.02% sodium azide and 50% glycerol.

Storage/Stability: Store at -20°C/1 year

Immunogen: The antiserum was produced against synthesized non-phosphopeptide derived from human p53 around the phosphorylation site of serine serine 9 (D-P-S_p-V-E).

Purification: The antibody was affinity-purified from rabbit antiserum by affinity-chromatography using epitope-specific immunogen

Specificity/Sensitivity p53 (Ab-9) antibody detects endogenous levels of total p53 protein

Reactivity: Human,

Applications:

Predicted MW: 53 kd

WB: 1:500~1:1000

Peptide - +

Western blot analysis of extract from HT-29 cells, using P53 (Ab-9)

Antibody (#21084, Lane 1 and 2).

Background :

Acts as a tumor suppressor in many tumor types; induces growth arrest or apoptosis depending on the physiological circumstances and cell type. Involved in cell cycle regulation as a trans-activator that acts to negatively regulate cell division by controlling a set of genes required for this process. One of the activated genes is an inhibitor of cyclin-dependent kinases. Apoptosis induction seems to be mediated either by stimulation of BAX and FAS antigen expression, or by repression of Bcl-2 expression. Implicated in Notch signaling cross-over
