

## Anti-DYKDDDDK Polyclonal Antibody

#T508

**Catalog Number:** T508**Amount:** 50µg/50µl 100µg/100µl**Form of Antibody:** Rabbit IgG in phosphate buffered saline (without Mg<sup>2+</sup> and Ca<sup>2+</sup>), pH 7.4, 150mM NaCl, 0.02% sodium azide and 50% glycerol.**Storage/Stability:** Store at -20°C/1 year**Immunogen:** The antiserum was produced by immunizing rabbit with a synthesized DYKDDDDK peptide (FLAG® epitope), FLAG® is a registered trademark of Sigma-Aldrich Co..**Purification:** The antibody was affinity-purified from rabbit antiserum by affinity-chromatography using epitope-specific immunogen.**Specificity/Sensitivity:** Anti-DYKDDDDK Antibody detects exogenously expressed DYKDDDDK proteins in cells. The antibody recognizes the DYKDDDDK peptide (the same epitope recognized by Sigma's Anti-FLAG® M2 antibodies) fused to either the amino- or carboxy- terminus of targeted proteins.**Reactivity:** All**Applications:** WB:1:500~1:1000

Western blot analysis of extract from 293 cells transfected with DYKDDDDK-tagged Bad using Anti-DYKDDDDK polyclonal Antibody (#T503).

### Background :

Epitope tags are artificial epitopes useful for the labeling and detection of proteins. Epitope tags - short amino acid sequences are 'fused' to the N- or C-terminus of the protein.
